

Great News for America

The Constitution, Freedom and Prosperity are Coming Back!

A Presentation by Gerard Francis Lameiro, Ph.D.

Author, philosopher, economist, engineer, and member of the 1980 Presidential Electoral College, Dr. Gerard Francis Lameiro, brings great news to America about the critical presidential election of 2016. The Constitution, freedom and prosperity are coming back!

Based on his book, *Great News for America*, Dr. Lameiro suggests that we all get ready for some big election year surprises. Indeed, the critical presidential election of 2016 will be nothing like we've seen before in our lifetimes, even if we've lived through many different presidential elections. In fact, it's shaping up to be the most profound presidential election since the critical election of 1896, an event that took place 120 years ago.

This presentation makes ten surprising predictions that are bold and powerful. These are stunning predictions, predictions about America, predictions about the 2016 presidential election, and predictions whose impact go far beyond this election. Indeed, this presentation predicts some historic events for America that will take place before, during and after the 2016 presidential election. These events will positively impact America for decades to come.

Dr. Lameiro offers an innovative and unique approach to understanding the forthcoming critical presidential election of 2016. It looks at all seven American Constitutional Eras from 1789 through 2016, along with all associated critical presidential elections that bracket those American Constitutional Eras. It culls out the reasons that triggered each successive, new American Constitutional Era and each new critical presidential election. Importantly, it identifies a repeating pattern that can be used to predict new American Constitutional Eras and imminent critical presidential elections before they happen.

This presentation provides insights into America, into its political history, and into its voters and their deeply-held beliefs on morality and freedom. It also clearly shows how voters in America are ultimately in charge; how they expect their political parties and political institutions to act; and how voters will decisively make parties and politicians accountable to themselves.

Dr. Lameiro's presentation will give you a front row seat on some profound and surprising American history about to be made in the critical presidential election of 2016.
